

From one link to a running fleet

How a new organisation gets set up, and how every admin or driver after that gets from an invite to their first day in the app.

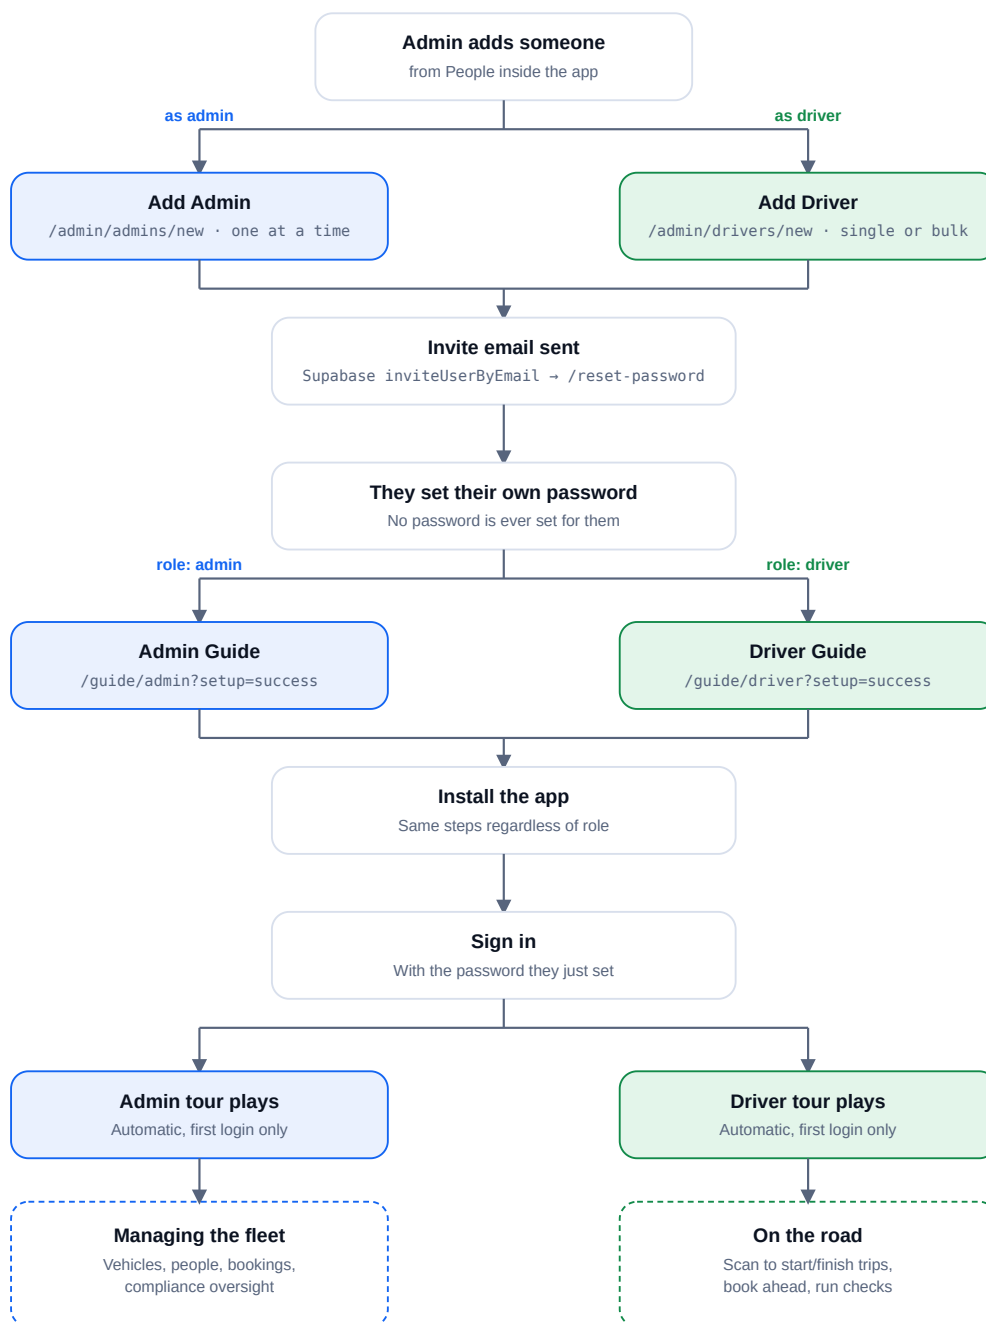

PART 1 OF 2 · ONE-TIME, PER ORGANISATION

Setting up a new organisation

No separate confirmation email, no manual account activation – one form submit on `/setup` does the whole thing.

Adding an admin or a driver

● Admin path ● Driver path

Worth remembering

- `/setup` has no secret token — its only protection is that the link stays private.
- The tour isn't gone after first login — it can be replayed any time from **Account** → **Replay Tour**.
- Every organisation on Fleet Tracker is fully separate — vehicles, people, bookings and records are never visible outside your own organisation.
